# Zoetrope template

• Enlarge the template by 100 per cent and copy onto stiff card. Cut around the thick lines.

• Fold the dotted lines in so that the picture bars are at right angles to the base.

• Stick the end of a pencil to the centre of the circular base using modelling clay. Place the zoetrope on a table top.

• Look through the slits and spin the pencil clockwise to see the man appear to run.

• Then, use the space above the running man to create your own animation!
