

Potent potions

- Cut out and place these teeth in the correct places.

Incisors

These teeth have a sharp, straight, cutting edge. There are four incisors, all grouped together.

Canines

Canine is another word for a dog; these teeth look like a dog's fangs. There are two of these sharp, pointed teeth.

Premolars

There are four of these wide, lumpy teeth. They are made for chewing and crushing food.

Molars

Molars look like premolars, but they are much bigger. These six teeth are for grinding up food.
