Wheels

Sam counts how many wheels she can see in the staff car park.

She counts 70 wheels.

Some of the vehicles are cars.

Some of the vehicles are bicycles.

Some of the vehicles are cars with just three wheels.

Some of the vehicles are lorries with 6 wheels.

How many of each type of vehicle do you think there are?

Use this space to find a solution to the problem.

Show your working out. Discuss this with your partner.

Now try the problem again.

This time, Mr Bloggs comes to school on a unicycle. This has only one wheel!
